Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/572,837	Applicant(s) TELYUK, TARAS M.	
	Examiner M. Lee	Art Unit 2622	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 March 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Fink et al. (5,237,411).

Regarding claims 1-3, 5, Fink discloses a teletext decoder showing a teletext processor 18 and a memory 24. With the control of the processor, the memory can be configured into the three sections for storing different teletext data as claimed. Using different configurations to store the teletext data is considered an intended use of the invention. Therefore, the processor and the memory together meet the memory configuration as claimed.

Regarding claim 4, the memory 24 as shown in Figure 3 is a sequential memory.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fink et al. (5,237,411).

Art Unit: 2622

Regarding claims 6 and 7, Fink discloses a page number storage memory (col. 3, lines 65-68, and col. 4, lines 1-4) except to indicate that the memory is a non-volatile memory as claimed. The examiner takes Official Notice that using a non-volatile memory to store data is well known in the art because it retains its memory content irrespective to the power supply status. This prevents data loss during power interruptions. Hence, it would have been obvious to one of ordinary skill in the art at the time that the invention was made to employ a non-volatile memory as the memory in Fink so that the operation of the teletext decoder could be maintained even during power interruptions.

Allowable Subject Matter

5. Claims 8-11 are allowed.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Alberlla et al. (20020093589A1) shows a data memory 24.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Lee whose telephone number 571-272-7349. The examiner can normally be reached on Monday through Thursday from 9 to 6.
